WAGE DECISION EXPECTED SOON

Salt Lake Railroad Man Receives Word From Board at Washington

SALT LAKE CITY, June 15.—The United States railroad board will announce its decision in regard to applications of railway employees for increased wages within a few days, according to information received here by D. C. Cunningham, local superintendent of motive power of the Denver and Rio Grande Railroad.

The telegram received by Cunningham follows:

The United States railroad board announces it will make a decision at the earliest possible date on the request for wage increases by railroad employees which were presented at the recent hearings held in Washington and Chicago. Inasmuch as the hearing has not been given to representatives of certain short line railroads and other carriers, the decision will necessarily cover only the employees of the roads represented by existing committees and such other roads as are properly before the board.

The decision will, however, cover 52 per cent of the railroad employees of the United States and it is said that the board, as soon as possible, will give hearing to the representatives of the short lines and other carriers not represented at the recent hearings and as soon thereafter as possible a decision on the applications of employees of these roads will be made.

"The decision, effective May 1, 1920, applies according to the time of all employees in the service since that date who intend to remain therein. We advise your road to send this advice to trade unions in this form."

Disease Treated By Color Waves

NEW YORK, June 15.—The treatment of disease by color waves was demonstrated by Dr. Dinshah B. Ghadiali, of New York, who said that scientists were mistaken when they believe the three primary colors of the spectrum to be red, yellow and blue. Red, green and violet are the colors, he contended, asserting this is proven by the fact that only a combination of these colors will produce white.

Explaining how the colors operate in restoring health, he said, that drugs function by disengaging the colors, composing them in the body. Thus, a person suffering from malaria fever takes quinine, the blue wave of which quinine is composed, he said, driving the fever out and curing the patient.

Light is as much an element of life as food, Dr. Ghadiali declared. In his theory, red represents anger; yellow, mentality; green, humility; blue, intuition; violet, spirituality; magenta, love; lemon, pride; orange, jealousy; turquoise, dignity; indigo, benevolence; purple, veneration; scarlet, lust.

IS YOUR SKIN ABLAZE WITH FIERY ITCHINGS?

Don't Continue to Suffer Because of Wrong Treatment.

At last science has determined the real source of all skin diseases, and with this enlightenment comes the reason why the prevailing treatment heretofore used has proven such a complete failure. It has been proven that impurities in the blood cause millions of tiny disease germs to set up their attack on the surface of the skin, and in the form of pimples, boils, eruptions and itchy, burning irritations, begin their disfiguring and destructive work.

Being in the blood, these disease germs can be reached only through the blood, and local applications have no effect whatever. That is why salves, ointments, lotions, washes and other remedies applied to the skin can do no more than give merely temporary relief. Soon the fiery itching breaks out again, for such treatment cannot reach the source of the trouble.

If you want genuine relief from the tortures of skin diseases, lose no time in discarding all local remedies, and begin taking S. S. S. today and you will be delighted with the results.

You can get S. S. S. at any drug store, and if you write to our physician he will gladly give you full instructions about your own case. Address Medical Director, 604 Swift Laboratory, Atlanta, Ga.
